

Unresolved Service Desk Questions Log

NU-OPS-020 Document ID: NU-OPS-020 Status: draft
Version: 1.0 Effective date: 2024-10-01 Access scope: operations_leads
Site scope: all_sites

Northstar Urgent Care Cooperative (NUCC)

Status: Draft working log (proposed future status: current) · **Version:** 1.0
Proposed issue date: 30 September 2024 · **Proposed effective date:** 1 October 2024, upon approval
Owner: Operations Desk Coordinator · **Access scope:** operations_leads

Fictional working record for the 1 October 2024 corpus snapshot. An entry here records a question, not its answer. A proposed next check is not a deadline or response commitment.

Log purpose and status

The Operations Desk Coordinator records operational questions that have been raised but are not answered by an identified source in the available corpus. Keep each entry open until a source and answer are recorded or the question is explicitly closed as not established. Silence, an unanswered message, or a role mailbox does not establish an answer.

The entries below are proposed as of the fictional snapshot date. This draft is not an approved or operational log. It does not assign authority, name a person, establish a service level, or create a new operational requirement.

Open questions

Q-020-01 — Alder Creek Site Lead backup

- **Question:** Who, if anyone, is the designated backup for the Alder Creek Site Lead when that role is unavailable outside the normal handoff?
- **Status:** Open — no answer established.
- **What the available records say:** NU-OPS-007 lists a fictional Alder Creek Site Lead role mailbox but no named incumbent or deputy. NU-OPS-012 records this question as a pending follow-up and says the huddle did not establish a backup.
- **Follow-up owner:** Operations Desk Coordinator (role).
- **Next check:** 14 October 2024, proposed. This is a check date only; no deadline or response time is established.
- **Evidence needed to resolve:** A confirmed source from an authorized operations owner naming a backup role or explicitly confirming that none is designated.
- **Do not infer:** The existence of the role mailbox does not show that it is monitored by a backup, that after-hours coverage exists, or who might hold that responsibility.

Q-020-02 — Vendor visit log retention period

- **Question:** What retention period, if any, applies to the site vendor visit and sign-in records described in NU-OPS-014?
- **Status:** Open — no answer established.
- **What the available records say:** NU-OPS-014 proposes storing sign-in and sign-out entries with or linked to the site facilities work record, but does not state a retention period.
- **Follow-up owner:** Not assigned in the available records.
- **Next check:** Not set.
- **Evidence needed to resolve:** An approved records schedule or a recorded decision by the responsible records owner that applies to this record type.
- **Do not infer:** Do not derive a retention period from the date on a visit record, the review date of NU-OPS-014, or another record type's practice.

Update and closure fields

For each entry, add an update only when there is a dated source or a documented contact attempt. Record the source, the fact it supports, the role confirming it, and any remaining uncertainty. Do not replace an open status with an answer based on an assumption.

Entry ID	Status	Follow-up owner	Next check	Last reviewed
Q-020-01	Open	Operations Desk Coordinator	2024-10-14 (proposed)	2024-10-01 (proposed snapshot review)
Q-020-02	Open	Not assigned	Not set	2024-10-01 (proposed snapshot review)

Explicit non-answer notice

This log does not establish an Alder Creek backup, after-hours mailbox monitoring, a vendor-log retention period, or a resolution date. If a question is asked before a confirming source is added, state that the corpus does not establish the answer. Do not fill an open item from silence or from a related role's title.

Revision record

Version	Issued	Effective	Change	Approval
1.0	2024-09-30 (proposed)	2024-10-01 (proposed; effective only upon approval)	Initial working log with two unresolved operational questions.	Operations Desk Coordinator as content owner; approval pending

Content owner: Operations Desk Coordinator.
Proposed next review: 14 October 2024.
